

Rent to Test UV LED Lighting

How to rent our UV LED lights to test and validate their effectiveness, ensuring they meet your specific needs?

1. Define the specifications of the UV LED system you need

- **Application:** Identify the intended use (curing, disinfection, fluorescence, etc.).
- **Wavelengths:** Choose appropriate LED wavelengths based on your application.
- **Dimensions:** Determine the required dimensions for the lighting system.
- **Light emission:** Assess the power and homogeneity needed to achieve the desired results.

2. Choose a product available for rent to validate the parameters

- **Rental duration:** Rent the equipment for a flexible period ranging from 2 weeks to 6 months.
- **Test at a lower cost:** Validate the solution without incurring immediate purchase costs.
- **Validate UV process parameters:** Test critical aspects such as time, intensity, and working distance.
- **Compare multiple products:** Use multiple devices simultaneously to find the best fit for your needs.

3. After testing and rental period

- **Acquire the equipment:** If the rented system meets your expectations, you can purchase it. Rental fees will be deductible in case of purchase.
- **Determine another suitable standard UWAVE product:** If your needs evolve, we can offer another standard product, more or less powerful, more or less large, according to your new requirements.
- **Define new specifications for a custom system:** In collaboration with our experts, you can create new specifications to develop a custom UV LED lighting system, perfectly tailored to your specific needs.
